Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the two straps connected to the protrusions must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 36 and 37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 36 and 37 include recitations of the face piece and port which have already been recited in the claims from which these claims depend. There is therefore a double recitation of these elements.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3761

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 23-26, and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Waracke-4470413.

Waracke discloses a facemask having a face piece 3, a port with a breathing tube therethrough and a chin portion (as seen in fig. 4) which encloses the chin of the user. The ridges in diaphragm are the claimed finger-receiving means.

Claims 24-26 and 37 are rejected under 35 U.S.C. 102(b) as being anticipated by Engelder-2625155.

Engelder discloses a facemask having a face piece 10, two ports 16 and 18, each of which holds suction catheters therein. Tubes 33 and 34 extend from the face piece and form the claimed finger-receiving means, as they constitute ridges.

Protrusions 13 attach the ends of 2 straps 14,15 to the face piece.

Claim 23 is rejected under 35 U.S.C. 102(e) as being anticipated by Christopher-6405725.

Christopher discloses a facemask having a face piece 20 having a port 23 for receiving a breathing tube therethrough, and a chin portion, which encloses the chin of the user (see fig. 5).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3761

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 36 and 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Waracke-'413 in view of Engelder-'155.

Waracke discloses the invention as claimed with the exception of the protrusions and the straps.

Engelder discloses protrusions 13 and straps 14 and 15 attached thereto. It would have been obvious to have provided Waracke with the straps of Engelder, as rubber or elastic straps are well-known in the art at facilitating the engagement and holding of the mask in place on the users face.

Allowable Subject Matter

Claims 1-19,31-35,38 and 39 are allowed.

Response to Arguments

Applicant's arguments with respect to the rejected claims have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3761

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
